**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/07/2006 has been entered.
2. Applicant's amendment dated 11/07/2006 has been received and entered. By the amendment, claims 1-9, 24-35 and 37-42 are now pending in the application.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 35-40 are rejected under 35 U.S.C 102(e) as being anticipated by Sakamoto et al., US Patent No. 6,853,421.

Claims 35-40 are anticipated by Sakamoto et al. figure 2 which discloses a liquid crystal display panel comprising:

- . a liquid crystal layer (17)
- . a first electrode (6)

Art Unit: 2871

- . a second electrode (5)
- . a third electrode (15), wherein the first and second electrodes selectively operate with the third electrode (e.g. reflective or transmissive) to create images.

***Allowable Subject Matter***

5. Claims 1-9, 24-34 and 42 are allowed.
6. Claim 41 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter:  
The references of record neither disclose nor make obvious a liquid crystal display device comprising a combination of various elements as claimed, more specifically of only one of the first and second set of electrode layers is operatively coupled to the thin film transistor to correspond to an active matrix mode, and the other one of the first and second set of electrode layers corresponds to a passive matrix mode to create images as set forth in claims 1-3 and 42.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung Nguyen whose telephone number is 571-272-2297. The examiner can normally be reached on Tuesday-Friday.
